

## A swiss new generation high performance product

Extracted from phytogetic sources,  
helps to utilize feed efficiently in the gut apart  
from its properties of natural antibacterial,  
antioxidant and digestive enhancer

### BENEFITS

#### Zootechnical

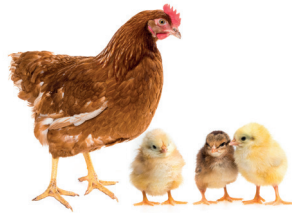

- Supports intestinal health and strengthens the immune system,
- Improves resistance to pathogenic micro-organisms and health condition of layers
- Helps to control pathogenic enteric flora
- Strongly reduces incidence of respiratory diseases
- Reduces effects of stress due to excellent antioxidant properties

#### Economical

- Increases growth and weight gain in chicks and growers.
- strongly reduces ammonia emissions in growing and laying houses
- Improves feed conversion
- Reduces need for medical treatments
- Reduces mortality and necessary culling
- Eliminates loose droppings, improves litter condition and disposal of feces.
- Helps in prevent cannibalism/feather picking in cage grower
